PERSONAL PROJECTS

Personal website (2022)

- Created a Personal Website using HTML, CSS And JAVASCRIPT.

Grocery List (2022)

- This is a cool app which will help us to create a grocery list in which we can add items as well as delete from the list.

Sales Forecast Analysis Dashboard using Tableau (2022)

- The main agenda of the project is to infer the past sales numbers of a company and then forecast their sales for the coming quarters and years.

Data Analysis on Disney+ and Netflix OTT Platform (2021)

- Comparing the trends and insights between the Disney+ streaming platform and Netflix streaming platform through exploratory data analysis.

Phone Directory using Linked List (2021)

- Implemented a Phone Directory using Doubly Linked list.

Travel salesman project using Python3 (2021)

- The problem is to find the shortest possible route that visits every city exactly once and returns to the starting point.

Login and Registration System using CPP. (2020)

- The project involves a user registration process by asking username and password. Upon successful registration, a user file is created with the credentials. If the user does not exist, upon login, an error will be shown.

SKILLS

HTML5
